

CHEMICALS FOR BOILER MAINTENANCE

Catalogue	Products	Packing
UNISOL.001	20% Trisodium NTA solution a descaling agent.	5 Gallons pails
UNISOL.002	20% Tetrasodium EDTA solution a stronger descaling agent.	5 Gallons pails
UNISOL.002B	20% Tetrasodium EDTA, 5% Trisodium Phosphate. Alkaline descaling agent.	5 Gallons pails
UNISOL.003	7% Phosphate Buffer, pH 10	5 Gallons pails
UNISOL.004	20% Sodium Sulfite. Rust preventing solution, Oxygen scavenger.	5 Gallons pails
UNISOL.005	10% Tetrasodium EDTA, 10% Sodium Sulfite. For Scale and rust prevention.	5 Gallons pails
UNISOL.006	20% Sodium Nitrite to avoid corrosion in hot water systems.	5 Gallons pails
UNISOL.007	30% Morpholine. Protects piping and radiators exposed to steam.	1 Gallon Plastic bottles
UNISOL.008	30% Diethyl-ethanolamine, same function as unisol.007.	1 Gallon Plastic bottles
UNISOL.009	50% Sodium Hydroxide. A caustic solution to rise the pH.	5 Gallons pails
UNISOL.010	ALL IN ONE, 2.5% Trisodium Phosphate, 10% Tetrasodium EDTA, 10% Sodium Sulfite. For Small boilers.	5 Gallons pails

We also do Custom Chemicals and Reagent
